Good science, honest science

This workshop will refresh your knowledge about the tangled topic of keeping science sound and honest.

Discuss the latest thinking in responsible research conduct and learn how to analyse and manipulate images with integrity.

Michele Garfinkel is the Manager of the Science Policy Programme at the European Molecular Biology Organization in Heidelberg, Germany.

Alison North is the Senior Director of the Bio-Imaging Resource Center and a Research Associate Professor at the Rockefeller University in New York.

Co-organised workshop between CRG and PRBB Intervals, and supported by the Marie Curie Action training network FLiACT.
